

AUGMENTED NAC

THE SPIKE PROTEIN DETOX

Health practitioners are calling it a game-changer. Long COVID, Covid vax injuries, and spike shedding all have the same cause: the highly toxic **spike protein**.

Augmented NAC is an enhanced supplement that helps remove the spike from the body.

ENDORSEMENTS

"After two AstraZeneca vaccines, I developed a constant two-year tremor, along with eczema, brain fog, low energy, and rosacea. Once I started Augmented NAC, the tremor vanished rapidly, my eczema improved, brain fog lifted, energy soared, and my rosacea began clearing.

I wholeheartedly recommend it to all patients."

DR PEERS

DR FUKUDA

*"In my clinic, **I have seen cases showing significant efficacy of Augmented NAC** in kidney damage, turbo-cancer, heart failure (arrhythmias), (rheumatic) interstitial pneumonia, MCI, stroke, and encephalitis including ME/CFS, Creutzfeldt-Jakob disease, and focal infections involving nasopharyngitis due to mRNA vaccine injury in cases unresponsive to steroids, LDN or Ivermectin."*

"In my clinic, we see a lot of stage 4 cancer, severe "vaccine" damage, severe long COVID cases that have been unresponsive to othertreatment strategies at other clinics. One of the main ways That we're able to solve these cases and help reverse these disease states is by using Augmented NAC.

Whether you're dealing with COVID vax injuries, long COVID, or even cancer, the very first priority of care should be to eliminate the spike protein.

Augmented NAC has proven to be an invaluable tool, some of our biggest victories in otherwise incurable cases have relied on it, and it never lets us down."

DR ROSCOE

The Story Behind the Development of **Augmented NAC**

Augmented NAC was developed by the nonprofit [ZeroSpike Project](#), an interdisciplinary research team from Italy focused on investigating the toxic effects of spike proteins. The team launched the ZeroSpike Project to study the spike protein in depth and explore potential methods of neutralizing it. Over the course of their research, they published more than 2,000 pages of scientific documentation covering COVID infection, the new mRNA technology, and the spike protein.

As their studies progressed, the team discovered that the spike protein is a highly toxic and it triggers numerous pathological health conditions. In response, ZeroSpike assessed different compounds and identified N-Acetylcysteine (NAC), derivative of the naturally occurring amino acid cysteine, with well-established health benefits, that is capable of detaching spike proteins from ACE2 receptors and denaturing them.

Initial in vitro tests, however, showed that standard NAC could denature spike proteins at only 12% to 15%. To enhance its effectiveness, ZeroSpike collaborated with scientists and experts using advanced equipment based on quantum physics principles, which “brought more order to the subatomic structure of the NAC molecule” and significantly enhanced its properties.

The result was Augmented NAC, a powerful supplement capable of denaturing up to 99% of spike proteins. In addition, Augmented NAC demonstrated synergistic effects with other supplements: in vitro studies showed that it protects vitamin C from oxidation and preserves glutathione from degradation more effectively than standard NAC.

How is **Augmented NAC** different from standard NAC?

Standard NAC denatures the spike too, but studies have shown it to be ineffective, with an average denaturation rate of only 12%-15%. In contrast, Augmented NAC achieves over **99%** spike protein denaturation.

Why is it essential for a spike detox supplement to cross the **blood-brain barrier**?

Spike proteins cross the blood-brain barrier, causing long-lasting damage to brain function and contributing to various neurological diseases.

Therefore, it is crucial to use a supplement that crosses the blood-brain barrier, detaches spike proteins from ACE2 receptors in the brain, and denatures them. We invite you to watch the video testimonial of Lisa from Australia who addressed this issue and explained the difference she started noticing once she began taking Augmented NAC after trying all other protocols and supplements.

Lisa's touching testimonial underscores the crucial role of Augmented NAC in crossing the blood-brain barrier. She shares why taking Augmented NAC was essential for her recovery, as it was the only supplement that helped restore her neurological health.

Augmented NAC – The 3-D Approach: Detach, Denature, Detox

This powerful detox supplement was specifically designed to help the body effectively eliminate spike proteins. In vitro studies show that Augmented NAC detaches spike proteins from ACE2 receptors and achieves over 99.8% effectiveness in denaturing them (that is known as "unfolding the protein"). Furthermore, Augmented NAC helps reactivate the liver, an organ rich in ACE2 receptors, enhancing the body's detoxification process.

The newly developed research project Urine Spike Test (UST) demonstrated that after taking Augmented NAC for at least seven consecutive days, the body begins to eliminate spike proteins, as fragments of spike proteins and their metabolites have been detected in urine samples, therefore confirming the 3-D approach through Augmented NAC.

Trusted by **thousands of health professionals** who have successfully incorporated Augmented NAC into their spike detox protocols, and with over **100,000 families** regaining their health.

The Science behind how Augmented NAC works

An independent laboratory conducted **two Docking analyses** to examine how Augmented NAC detaches spike proteins from receptors and denatures them. Thanks to such Docking analysis, it was possible to localise the interaction sites between Augmented NAC, spike protein and ACE2 receptors, as well as to assess the resulting conformational and, possibly, configurational changes. The results of the Docking analyses are available on request.

Furthermore, recent studies indicate that Augmented NAC also possesses anti-prion properties, an extremely valuable quality that can help overcome fatal neurodegenerative disorders caused by the spike proteins.

Unlike other approaches, Augmented NAC stands as the ultimate solution for effective spike protein detoxification.

TESTIMONIALS

*"Not only that it has saved my life...
But it improved the quality of my life!"*

Tiffiney

*"You have saved my life literally...
Thank you!"*

Lisa

*"My heart went from 45% function to
100% healed! I think Augmented NAC
saved my life."*

Meegan

*"I am back to my old self again...
I am actually feeling so much better!"*

Anna

ALEXANN

I am so grateful for this product...lots of significant healing happening and I share my experience since so many of my friends have purchased it

Good job I will be using it for a long time.

PETER

Hello,

My name is Peter. First of all big thanks for your guys work. The Augmented NAC has been an absolute game changer for me in dealing with my long covid symptoms.

TESTIMONIALS

"Within 48 hours all my symptoms were gone..."

Dr. Deneff

"I have got my life back!"

Lindsay

"Chest pain for 2+ years and red-purple skin color in my lower legs – gone in days"

Peter

"After 51 days I woke up and I was basically healed.

It saved my life in 51 days."

Don

SUSAN

Thank you We have received our order the other day!!

Already seeing results. So so grateful for your product

sincerely

DON

My only regret in the video testimonial is that I did not thank the Zero Spike Group for saving my life.

General dosage recommendations from health professionals using Augmented NAC in their protocols:

For those who suffer from severe COVID vax injuries:

The general recommendation is 2 to 6 capsules daily. Suggested timing:

- 2 capsules daily: 1 capsule in the morning before a meal and 1 capsule in the evening before a meal.
- 3 capsules daily: 1 capsule in the morning, 1 in the afternoon before a meal, and 1 in the evening before a meal.
- 4 capsules daily: 2 capsules in the morning before a meal and 2 capsules in the evening before a meal.
- 6 capsules daily: 3 capsules in the morning and 3 capsules in the evening before meals.

For those with spikeopathy associated with spike protein shedding and/or Long COVID:

Health professionals generally recommend 2 to 3 capsules daily. Suggested timing:

- 2 capsules daily: 1 capsule in the morning before a meal and 1 capsule in the evening before a meal.
- 3 capsules daily: 1 capsule in the morning, 1 in the afternoon before a meal, and 1 in the evening before a meal.

For those taking Augmented NAC for health maintenance:

The general recommendation is 1 to 2 capsules daily.

Augmented NAC is generally recommended to be taken on an empty stomach with plenty of water, 15 to 30 minutes before meals. However, for individuals who are highly sensitive, it is advisable to take it with meals to help minimise potential digestive discomfort.

Important note: these are general recommendations from health professionals who have incorporated Augmented NAC into their protocols. The exact dosage should be determined by the health professional and the individual based on what works best for them.

How can a highly sensitive individual mitigate the (very rare) but possible initial detox reaction to **Augmented NAC**?

Dr. Tina Peers (UK) recommends this for highly sensitive individuals starting Augmented NAC:

Step 1: Preconditioning (1 Week) Ordinary NAC (Ordinary N-Acetylcysteine):

Take 600 mg once daily for 7 days. Binders (to support detox): Take zeolite or activated charcoal daily, as directed on the product label, to assist in binding and removing released toxins.

Step 2: Introduction of Augmented NAC (ANAC)

Days 1–2: Take 1 capsule of ANAC per day (preferably in the morning).

Days 3–4: Increase to 2 capsules per day (1 in the morning, 1 in the evening).

Day 5 onward: Increase to 3 capsules per day (1 in the morning, 1 in the afternoon, and 1 in the evening), as tolerated.

Scott Marsland FNP-C (USA) from the Leading Edge Clinic recommends:

Use PectaSol **or** PectiClean to mitigate a strong (rare) initial reaction to Augmented NAC.

- PectaSol

Powder form: 5 grams, three times daily

Capsule form: 3 capsules, five times daily

Refer to the product packaging for standard dosing instructions.

- 2. PectiClean

More potent than PectaSol and used in smaller amounts.

Recommended dose: One 0.5g packet once daily

Mix with boiling water, sip slowly on an empty stomach

Timing Recommendation:

For optimal results, begin both PectaSol and PectiClean at the start of ANAC protocol implementation.

*Augmented NAC is generally recommended to be taken on an empty stomach with plenty of water, 15 to 30 minutes before meals. However, for individuals who are highly sensitive, it is advisable to take it with meals to help minimise potential digestive discomfort.

ZeroSpike Health Network

Health professionals are warmly invited to join the rapidly expanding ZeroSpike Health Network, which now includes tens of thousands of practitioners worldwide who are using Augmented NAC in their clinical practice to address a wide range of health conditions, including spike detoxification and other pathologies, and to support the overall health and well-being of their patients.

By registering on the ZeroSpike Health Network portal, you will gain access to a comprehensive collection of scientific data on Augmented NAC, expert-led webinars, and integrated clinical protocols shared by professionals around the world who are successfully incorporating Augmented NAC into their practice.
